hello-world

My first ever github repo. This is the first branch commit exercise

PDF Converter

This repository includes a powerful PDF conversion tool that can convert Markdown and HTML files to PDF format.

Quick Start

```
# Install dependencies
pip install -r requirements.txt

# Convert a Markdown file to PDF
python3 convert_to_pdf.py README.md

# Convert with custom output name
python3 convert_to_pdf.py input.md output.pdf
```

Features

- Convert Markdown (.md) files to beautifully formatted PDFs
- Convert HTML files to PDF
- GitHub-flavored styling
- Support for code blocks, tables, images, and more
